Shoes That Satisfy.

Advice to Housewives.

In the June Woman's Home Companion the cookery editor writes a page of advice to housewives on the subject of canning June fruits. The jelly-making, canning and preserving time is approaching and the directions given are particularly valuable just now. Following is an extract from the general directions:

"Fruit for canning should be fresh, firm, of good quality and not over-ripe."

"For canning fruit allow one third its weight in sugar, and two and one half to three cupfuls of water to each

pound of sugar.

"To sterilize jars: Wash jars and fill with cold water. Set in a kettle on a trivet and surround with cold water. Heat gradually to the boiling point, remove from kettle, empty and fill while hot. Let covers stand in hot water five minutes. Dip rubber bands in hot water but do not allow them to stand. Always use new rubbers and see that the covers are in perfect shape."

Did You Buy?

"Here you are, gents," shouted the street faker, "the greatest invention

of the age."

And as the crowd gathered around him he went on:

"A magnetized keyhole plate for front doors. It will attract an ordinary steel key from a distance of three feet. All you have to do is to take out your key and hang onto it."

A British army corps is approximately, 38,000 men; an Austrian is about 53,000 men, while the strength of French, Russian and Germany army corps varies from 40,000 to 55,000 men.

REVIEW OF WEEK ON EXCHANGE

Decision in Dissolution Suit Against Trust Leading Feature.

New York, June 5.—The feature of the week in operations on stock exchange was the influence of the federal court decision acquitting the United States Steel corporation from any violations of anti-trust laws. On this news steel rose to 61, the highest price of the year, and more than 10 points over its ruling quotation in January, when the common dividend was passed.

All parts of the stock list shared in the advance, and some of the specialties under government prosecution have risen 6 to 16 points, with Harvester, as the greatest gainer. Realizing sales in heavy volume followed the rise, with concurrent declines.

In the forefront of the week the market manifested uncertain tendencies on moderate amount of business. Foreign conditions, while admittedly less tense, were further complicated by the injection of the Mexican situation. Railroad reports for the week showed a preponderance of gains in earnings at the expense of enforced economies. The industrial situation reflected a marked improvement in steel and metal trades.

Advice to Mothers About Babies.

In the Better Babies department of the June's Woman's Home Companion appears considerable material in regard to the care of children that is of value to mothers. Following is an extract from the Mother Calendar for June:

"Dress your children loosely and simply in hot weather. If they want to run barefoot, substitute sandals for shoes and stockings. Sandals protect from stone bruises."

"Milk used by children or adults should not be more than twenty-four hours old. Milk does not have to sour to be unfit for food."

"In warm weather, give your baby plenty of cooled, boiled water. Never give him iced water nor unboiled water."

"Do not handle babies more than is absolutely necessary. Keep them in cool, well ventilated rooms. Never leave them in the sun."

Frightfulness.

A personally conducted tour by the Logic of Frightfulness leads us—where Mr. Thomas A. Edison is reassuring with regard to the excitement of the mental adventure. He has recently remarked: "Of course, science can find much more effective ways of destroying life than by artillery and rifle fire, or the use of high explosives. The possibilities of chemistry and electricity have hardly yet been touched upon in modern warfare. They can do a lot better."

And yet they seem to be doing pretty well as it is. The death of Captain A. Noel Edwards should forcibly remind a good many thousand Americans who have seen and admired him in his role of the dashing polo player of the destructive efficacy of the chlorine fumes which the Germans have been releasing in their trench warfare. The victims of this gas, the reports say, turn black and cough themselves to death slowly and in agony. Even Mr. Edison (who, by the bye, is almost as peacefully inclined as Mr. Bryan) should consider such results a good beginning.

An American concern, the Cleveland Automatic Machine Company, very calmly suggests the next step in its advertisement (referred to by "The New Republic") of a high explosive shell. Inside the shell are two explosive acids. "Fragments become coated with these acids in exploding and wounds caused by them mean death in terrible agony within four hours if not attended to immediately. . . . From what we are able to learn of conditions in the trenches (it is the advertisement that is being quoted) it is not possible to get medical assistance to any one in time to prevent fatal results. It is necessary immediately to cauterize the wound, if in the body or head, or to amputate, if in the limbs, as there seems to be no antidote that will counteract the poison."

For effectiveness this high explosive shell should win in any honestly conducted voting contest over chlorine gas.

Then there is "Life's" scarcely concealed advice to Germany to diversify her wartime diet by eating her war prisoners. This would solve two problems, that of her food supply and of her maintenance of the million or more men now interned on her soil. Like the use of poisoned weapons, it was a military economy practiced by our remote ancestors. Its effectiveness is positively appalling.

But we seem to be traveling in a wide circle back to the beginning of things. Rather stupid in the Logic of Frightfulness to lead us by such a roundabout way to a point so quickly reached by direct thought.

Winthrop College.

SCHOLARSHIP and ENTRANCE EXAMINATION

The examination for the award of vacant scholarship in Winthrop College and for the admission of new students will be held at the County Court House on Friday, July 2, at 9 a. m. Applicants must not be less than sixteen years of age. When Scholarships are vacant after July 2 they will be awarded to those making the highest average at this examination, provided they meet the conditions governing the award. Applicants for Scholarships should write to President Johnson before the examination for Scholarship examination blanks.

Scholarships are worth \$100 and free tuition. The next session will open September 15, 1915. For further information and catalogue, address Pres. D. B. Johnson, Rock Hill, S. C.

THE LOAFING ROOM.

It was a busy day, with night approaching.

She floated into the literary room like a vision.

She lingered like a nightmare.

When at last she departed, leaving the delayed book reviewer hesitating between tears and spartan fortitude, she smiled sweetly:

"You have so many books to read, don't you. How nice to do nothing but read books all day and then write about them. You must pardon me if I've kept you talking too long, but it does seem so fascinating to find someone in a newspaper office who doesn't have to work!"

A Red Day.

Patience—See how red her eyes are.

Patrice—What made them so red?

"Crying."

"About what?"

"Because her husband's nose is so red."

Know Him?

Howell—What sort of a fellow is he?

Powell—He can make two lemons grow where only one grew before, and then hand them both to you when you are not looking.—Judge.

APPROPRIATE.

The Poet—What became of my great ode to the pumpkin?

The Editor—Your ode to the pumpkin? Why, er—the typesetter pled it.

The Benefactor.

A benefactor is that one, And I think something more, Who makes a dozen smiles to come Where just one came before.

An Incentive to Dreams.

"Why do you ask for the bill of fare every evening? You never order anything."

"No; but, then, you know, I always have such wonderful dreams at night!"—Man Lacht (Berlin).

Drawing the Line.

"Do you believe that every man should be the architect of his own fortunes?"

"I certainly do, but I don't believe that every woman ought to be the architect of her own beauty."

Slim Chance.

Patience—Harry says he has promised himself that some day he will have an automobile.

Patrice—Oh, yes; but you know what his promises amount to.

A Change.

"When torture was a part of judicial process, they mangled prisoners."

"We've changed that. Now we only iron them."

Misunderstood.

He (nervously)—Margaret, there's been something trembling on my lips for months and months.

She—Yes, so I see; why don't you shake it off?

Strange Result.

"What they call the auto face is a fixed stare."

"Well, what of it?"

"It ought to be more of a mobile face."

Extraordinary.

"Mrs. Twiddle is a serious-minded woman."

"Indeed she is. Why, she even takes the refreshments served at a card party seriously."

WAY TO KEEP OUT OF JAIL.

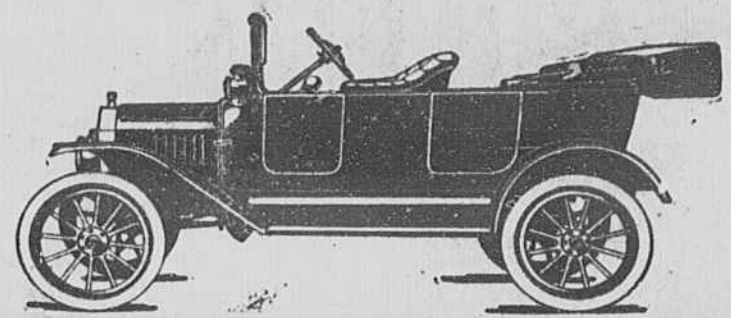

The Candidate—My friends, what is the price of liberty?

One of His Hearers—One of the prices is honesty.

Mechanical Aid.

A statesman works too hard by half. His life is awful fustier. Why can't he hire a fustier? To do his fustiering?

Half the joy of motoring, either for business or pleasure, comes from dependable service and Ford economy, and explains why half the car owners today drive Ford cars. An average cost of two cents a mile for running and maintenance. Barring the unforeseen, each retail buyer of a new Ford car, between August 1914 and August 1915, will receive from \$40 to \$60 as a share of the Ford Motor Company's profits.

Touring Car \$490; Runabout \$440; Town Car \$690; Coupelet \$750; Sedan \$975; f. o. b. Detroit with all equipment.

One Experience Convinced Me of its Value

"One of our salesmen demonstrated the value of the Long Distance Telephone to us. He was at Huntsville, Ala., and upon his own responsibility put in

Long Distance calls for fifteen merchants within a radius of several hundred miles.

"In less than one hour he had sold 2100 barrels of flour at a total cost to us of less than six dollars.

"Since then we have applied the Long Distance Bell Telephone to every feature of our business with most profitable results. The service is fine, the rates are reasonable and there is more satisfaction in one Long Distance Telephone talk than in half a dozen letters".

Every Bell Telephone is a Long Distance Station.

SOUTHERN BELL TELEPHONE AND TELEGRAPH COMPANY.
